

OUR HIGH-DOSAGE TUTORING MODEL

10 ESSENTIAL ELEMENTS

At the GO Foundation, we recruit, train, and support a corps of young adults who are placed as Fellows in GO partner and charter schools, where they tutor students as part of a year of service through the federal AmeriCorps program. The 10 essential elements of GO's approach are:

Tutoring for *all* students

Tutoring is provided to a complete cohort of students - whole school, whole grade, or whole classroom.

Mentoring year-round

Fellows are assigned to work intensively with up to 15 students over the school year, a small enough cohort to position a Fellow to be able to meaningfully mentor those students.

Small group instruction

Fellows are scheduled for settings where they are working with no more than 5 students (and ideally 2/3) at any one time.

In-person relationship-building

Tutoring is provided in person, not online, and is structured to allow a Fellow to connect individually with students and provide genuine mentorship.

Focus on ELA & Math

Each student served by tutorial received at least 90 minutes per week of Math and/or ELA each.

Focus on DEIA

Fellows are recruited to reflect the diversity of the students they support and are trained to deliver lessons in a way that is culturally responsive.

Rich ELA & Math Instruction

Fellows deliver lessons through a set math/ELA curriculum, provided by the partner school.

Fellow-Teacher Collaboration

Fellows meet regularly with teachers, are connected to student data and are observed regularly to be able to continuously improve their performance.

Professional Development

Fellows are developed over the course of their year of service to prepare them for their next step professionally, including the GO Teacher Residency Program.

Fellow-Family Communication

Fellows communicate with home regularly.
