

Innovation Diploma Outcomes

Explore

I can conduct the research needed to create an academically and ethnographically informed problem statement.

Create

I can build something to test out an idea that is connected to solving an important problem or meeting a significant need.

Learn

I can analyze the data collected in a skillful way and then apply the results to inform iterations and further prototyping.

Self-Awareness

I am aware of my strengths, limitations, and biases in understanding the problem and the impact of my design.

Build Community

I know how to choose the right people to work with, taking care to be inclusive and collaborate with a wide range of people.

Understand Impact

I can consider what the world would look like if everyone used my design. I will understand the design's impact in multiple contexts, specifically in the areas of sustainability, justice, equity, law, and/or health.

Project Management

I can organize and manage both the work needed to implement the solution and the people involved in design work.

Storytelling

I can communicate work to others in a way that inspires them to support implementation.

Collaboration

I can work with others to create and share proficient design work.

Seek Inspiration

I demonstrate curiosity about problems and the relationship between actions and outcomes. I continually question the impact of a wide range of possible approaches to problems.

Take initiative

I think it's my responsibility to contribute to solving this problem.

Persistence

I keep going in the face of obstacles.

Self-Direction

I can independently organize and execute my learning and my work to meet outcomes by a deadline.
